

The Norwegian Army has commissioned the order for delivery of a complete Biosep[®] MBR to **Aquantis** and our Norwegian partner **Krüger Kaldnes**. The MBR not only fulfils the high Nato standards but also meets further requirements for overseas use in different climates.

The unit has a capacity of 600 p.e. and is containerized. It consists of a buffer tank, a Biosep[®] MBR with plate membranes and the electrical equipment.
